## WHAT ARE RESTRICTED KEY SECURITY LOCKS?

Restricted Keys are a keying system that gives you total control over the keys for your locks.

This is achieved by fitting a restricted key barrel to the lock, with a unique profile that only the Restricted Keys will go into, and issuing the required amount of Restricted Keys that suit this new keying system.

When you first set up the keying system, only the designated names on your signature form can ever purchase more keys. Your supplier (e.g. Keyhole Surgery Locksmiths) will keep a secure record of your keying codes and signature form, so in the future if you need any further Restricted Keys or locks, the authorised signatories will be able to request further numbered copies of the key, upon matching verification of the signature held on your supplier's records.

### Dear Reader

Unfortunately, now more than ever, there are greater threats to both people and property. While this is not something we should become alarmed by, it is an issue that we all need to be aware of. The owners of all types of businesses, including shops and retail outlets, are not immune from this. In fact, these types of businesses can often be a target and business-owners need to protect themselves accordingly.

So, take a look around your business. How secure is it? Is the personal security of you, your staff and customers as protected as it can be? How vulnerable are property and stock? Once you have assessed potential security issues, take action!

Security planning does not necessarily have to involve sophisticated or expensive measures. A simple evaluation of potential risks and practical, cost-effective strategies could prevent considerable loss.

***Follow the tips below to start securing your business premises....***

## SECURITY TIPS FOR YOUR BUSINESS

1. **Key and valuables control.** Is there a key register? Are all keys secured? Do staff have somewhere to store their personal items securely? Is there restricted access to this area?
2. **Doors and windows.** Are the external doors and windows solidly constructed? Are they fitted with deadlocks? Are doors and windows locked at all times? Are skylights secured?
3. **Security lighting.** Is security lighting installed throughout and around the premises? Are all lights operating? Is some lighting left on inside the business at night? Are entry and exits well lit?
4. **Safes.** Has a safe been installed? Is it appropriately positioned? Is it kept locked?
5. **Alarm systems / surveillance equipment.** Is an intruder alarm system installed? Is it monitored? Is surveillance equipment installed?
